PROFESSIONAL SUMMARY

Full Stack Developer with experience building and maintaining production web applications using React, Node.js, Express.js, and MongoDB. Worked on CRM and EdTech platforms covering authentication, role-based access control, lead management, analytics, payments, and deployment. Comfortable handling the complete development lifecycle, from database design and API development to cloud deployment and production support on AWS.

TECHNICAL SKILLS

Frontend: React.js, Vite, JavaScript, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control (RBAC)

Database: MongoDB, Mongoose

Cloud & DevOps: AWS EC2, AWS SES, Nginx, PM2, Linux

Tools: Git, GitHub, Postman, VS Code

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer | AcreLoop CRM

Jun 2026 – Present

Developing and maintaining AcreLoop, a multi-tenant CRM designed for real estate organizations. Responsible for architecture, feature development, deployment, and production maintenance. Built lead management, follow-up tracking, activity history, analytics, reporting dashboards, and user management modules while implementing tenant-level data isolation and role-based access controls. Manage production infrastructure on AWS EC2 using Nginx and PM2, including deployments, monitoring, and environment configuration.

Stack: React · TailwindCSS · Node.js · Express · MongoDB · AWS EC2 · Nginx · PM2

Full Stack Developer | EdTech Company

Jan 2025 – Jun 2026

Worked on three production EdTech platforms serving students, UPSC aspirants, and working professionals. Developed features related to course management, enrollments, authentication, content delivery, and online payments. Designed REST APIs, implemented MongoDB schemas, integrated Razorpay payment workflows, and contributed to feature releases and platform maintenance across multiple products.

Stack: React · Vite · TailwindCSS · Node.js · Express · MongoDB · Razorpay · HEROKU

SELECTED PROJECTS

AcreLoop CRM

Multi-tenant CRM platform built for real estate organizations to manage leads, teams, follow-ups, activities, and reporting. Implemented role-based permissions, analytics dashboards, lead lifecycle management, and secure tenant-level data isolation. Responsible for both application development and production deployment.
